LinkAmerica Initiates Fleet Enhancement Program

TULSA, OK (January 5, 2012) - LinkAmerica Corporation, a regional asset based transportation and logistics services provider, today announced a major upgrade to its fleet operations.

Starting immediately, LinkAmerica will be replacing 575 pieces of equipment as part of its new fleet trade cycle program. This entails tractors from Freightliner and Peterbilt, as well as 53 foot plate trailers from Stoughton. Additionally, LinkAmerica has enhanced its driver recruiting and retention efforts as part of its "best-in-class" initiative.

"Replacing 20% of our fleet with new equipment, combined with our focus on our professional drivers, is part of our commitment to provide superior service to our customers and to be positioned to grow as customer demand grows," said John Simone, president and CEO of LinkAmerica. "Improved performance from this upgrade will help us meet and exceed the service levels defined by our customers."

About LinkAmerica Corporation

Headquartered in Tulsa, Oklahoma, LinkAmerica is a transportation and logistics provider offering solutions delivered through four divisions: 53' Super Southwest & Super Southeast Regions, LinkAmerica 57, Teams, and Logistics Services. LinkAmerica retains a "blue-chip" customer base and operates primarily in the southwest, south-central, and southeastern United States.
